Adams Patent Blacking.

Vinegar	40 Galls.
Spongy Black	90 lb.
Ol. Olive	3 Galls.
Sugar	28 lb.
Cl. Vitriol	18 lb.
Gum Arab.	1 lb et 3ij

Procure a tub, with a tin strainer fixed under its lid, nearly of the same size as the lid & full of small holes. Put the Spongy Black, the Sweet oil & Sugar & 4 Galls. of Vinegar into the tub, & make them into a thin paste, then apply half the Cl. Vitriol thro' the lid and strain:—and after letting it stand 5 or 10 minutes, pour thro' the strainer about two galls. more of the vinegar, then take off the lid and gradually pour in the remainder of the Vinegar, keeping the whole continually stirring till all the vinegar is used: put on the cover, & add the Cl. Vitriol in thro' the strainer, then pour it into a copper, put in the Gum Arab. & let the whole boil & when it begins to boil, it is fit to be drawn off & when cold, to be bottled;—but when bottling, should be constantly stirred.

14 Blank Leaves Not Scanned

Elmer. Vol. 2.  
National Library of Medicine  
Bethesda, MD

Condition On Receipt: The half leather and decorated paper binding was extremely dirty, worn, abraded, deteriorated and powdery, particularly at the corners, edges, endcaps and joints. The joints and internal hinges were partially broken. The sewing was loose. The pages were dirty, discolored, acidic, weak and brittle. The manuscript inks present were acidic and varied in intensity.

Treatment: The volume was collated and disbound. The inks were tested for solubility. The head, tail and pages were dry cleaned and washed and then buffered (deacidified) with magnesium bicarbonate solution. Tears were mended and folds guarded where necessary with Japanese paper and rice starch paste. The volume was sewn on linen tapes with linen thread. Windsor handmade paper ends with a linen hinge were attached. The volume was case bound in full cloth. Title information and lines were stamped in gold foil onto the spine.
